Education

Indian Institute of Information Technology, Kottayam Aug 2023 – May 2027
Bachelor of Technology in Computer Science and Engineering CGPA: **8.26** / **10**
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Technical Skills

Programming Languages: C, C++, Java, Kotlin, Python
Backend Development: Spring Boot, Django REST Framework, GCP
Android Development: Jetpack Compose, XML, MVVM, Retrofit, Coroutines, Hilt, Room, CameraX
Databases: MongoDB, MySQL, Redis
DevOps & Tools: Docker, Kubernetes ,Git ,GitHub

Projects

API Rate Limiter SDK | GitHub
Java, Spring Boot, Redis, Docker
- Engineered a **Redis-backed distributed rate-limiting SDK** for microservices with global and service-level throttling.
- Implemented **Token Bucket** and **Sliding Window Counter** algorithms using Redis Lua scripts for atomic, consistent, and scalable request throttling.
- **Load-tested the system with 100,000+ requests**, successfully throttling **99.995% of excess traffic** without service degradation.

Store Management System | GitHub
React.js, Django REST Framework, MongoDB, Python, Gemini API, Razorpay
- Developed **RESTful backend services** using Django REST Framework and MongoDB to manage inventory, sales, employees, and customer operations.
- Integrated **Gemini API** to generate real-time inventory and sales insights, **Razorpay** for secure online payments, and an automated Gmail-based alert system for low-stock notifications.
- Implemented **JWT authentication**, role-based access control, and scalable REST APIs while **leading a team of 4 developers** by defining the system architecture, MongoDB schema, and API contracts.

Image Downloader | GitHub Nov 2025 – Dec 2025
Kotlin, Spring Boot, Retrofit, Coroutines, MVVM
- Developed a **full-stack image downloading application** with a **Kotlin** Android client and **Spring Boot** backend for image retrieval and management.
- Built **REST APIs** for image URL validation, download processing, and reliable handling of external image resources.
- Integrated **Retrofit**, **Coroutines**, and **MVVM architecture** to enable asynchronous networking, maintainable code structure, and responsive user experiences.

Experience

Software Developer Intern | Certificate Jan 2026 – Apr 2026
AutonoPros Remote
- Developed **Android (Kotlin)** and **Flutter** application features, contributing to the migration from a native Android application to a cross-platform solution.
- Created reusable Flutter UI components and integrated **REST APIs** using a modular architecture, **reducing codebase duplication** and improving development velocity.
- **Delivered over 60% of the Flutter application's core functionality**, accelerating project progress and ensuring on-time completion of assigned deliverables.

Extra-Curricular Activities

- Solved **750+ Data Structures and Algorithms problems** on LeetCode and GeeksforGeeks using C++ and Java, achieving a **peak LeetCode rating of 1551**.
- Contributed to **OpenMF Mifos Mobile** by improving Login Screen input handling and UI/UX under mentor guidance.
- Selected among the **top 1,000 participants from over 40,000 applicants** and earned certification from **AlgoUniversity Dynamic Programming Camp**.
- Completed the **Telstra Software Engineering Job Simulation**, building **Spring Boot APIs**, writing Cucumber test suites, and performing SonarQube quality analysis.
